

CHANGES AND CORRECTIONS
TO THE
TRSDOS-II REFERENCE MANUAL

Make the following corrections to your TRSDOS-II Reference Manual:

page

2/7 ATTRIB -- the WRITE option no longer exists. If you specify WRITE, it defaults to RENAME.

2/60 FORMS -- two new options:
 O specifies that a DMP or DWP series printer is attached, such as a DWP-410 or a DMP-400.

 F specifies that an older printer is attached, such as a Line Printer V or a Daisy Wheel II.

To use DMP type printer with TRSDOS-II type:

 FORMS O

at TRSDOS-II Ready. You may wish to put this command in an automatic command file (see AUTO) so that it is executed every time you start up TRSDOS-II (TRSDOS-II starts up with FORMS F).

2/57 FORMAT -- SIZ can be any number from 1 - 1220 (not 2220).

2/93 SAVE -- the DC/DM options should be used with wildcards only.

2/103 SPOOL -- using background printing, you can print from a spool file while you use the system.

3/106 SOUND SVC -- the sound duration must be stored in the L register. The H register is ignored.
